

Nastavení Google API v systému Cf Control

1. Přejděte na stránku <https://console.developers.google.com/>
2. Přihlaste se do Google účtu, pod kterým chcete mít API vedené
3. Vytvořte nový projekt

4. Vyplňte všechny položky a klikněte na **Create**

New Project

Project name [?]
Cf Control

Your project ID will be cf-control-1156 [?] Edit

[Hide advanced options...](#)

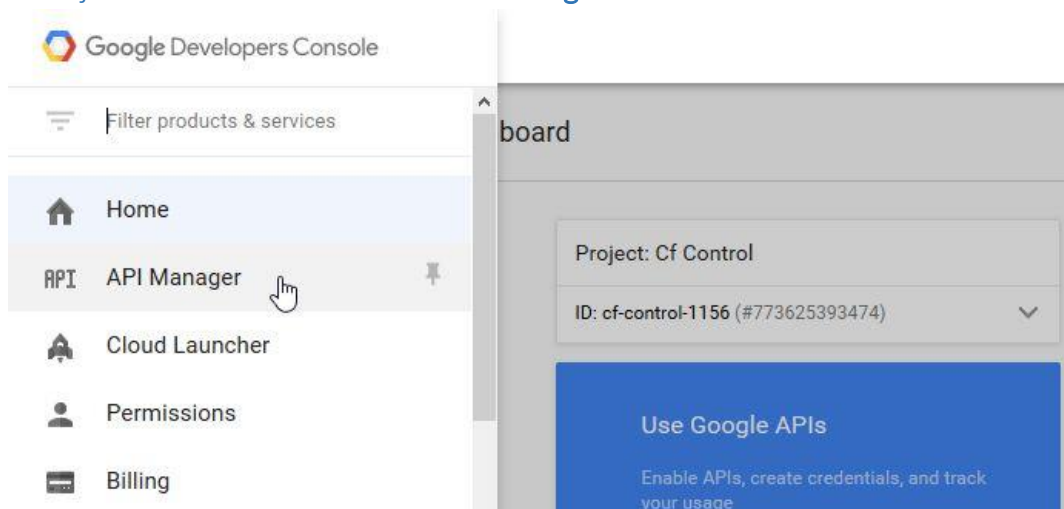

App Engine location [?]
europe-west

Please email me updates regarding feature announcements, performance suggestions, feedback surveys and special offers.
 Yes No

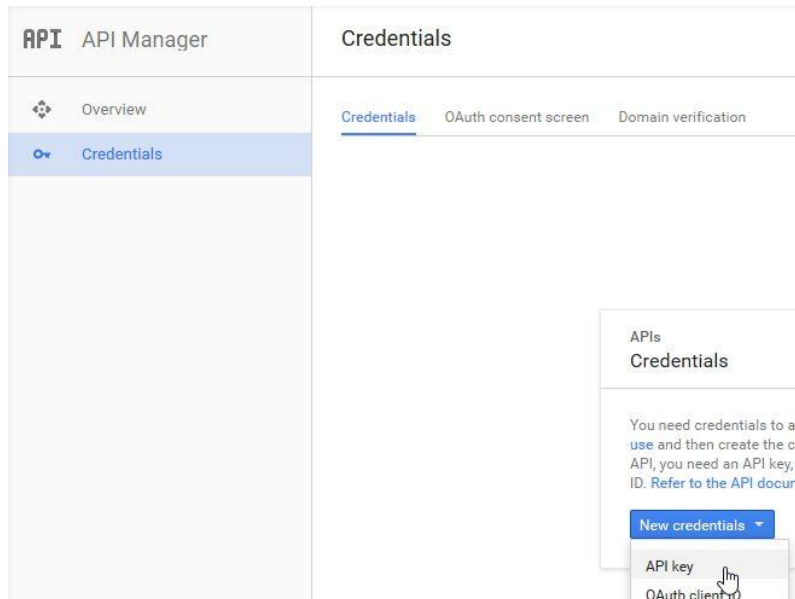

I agree that my use of any services and related APIs is subject to my compliance with the applicable Terms of Service.
 Yes No

Create Cancel

5. Přejděte v hlavním menu na **API Manager**

6. Zvolte položku **Credentials** a následně klikněte na **New credentials** -> **API key**

7. Zvolte **Server key**, vyplňte název a IP adresu, na které běží Cf Control (IPv4, případně IPv6) a klikněte na **Create**

Create server API key

This key should be kept secret on your server

Every API request is generated by software running on a machine that you control. Per-user limits will be enforced using the address found in each request's `userIp` parameter, if specified. If the `userIp` parameter is missing, your machine's IP address will be used instead. [Learn more](#)

Name

Accept requests from these server IP addresses (Optional)

Examples: 192.168.0.1, 172.16.0.0/12, 2001:db8::1 or 2001:db8::/64

8. Znovu klikněte na **New credentials** -> **API key**

9. Zvolte **Browser key**, vyplňte název a DNS adresu systému Cf Control

Create browser API key

Use this key in your web application

API requests are sent directly to Google from your users' browser. [Learn more](#)

Name

Accept requests from these HTTP referrers (web sites) (Optional)

Use asterisks for wildcards. If you leave this blank, requests will be accepted from any referrer. Be sure to add referrers before using this key in production.

10. Přejděte na **Overview** a následně na **Enabled APIs**

11. Zakažte všechna API pomocí tlačítka **Disable**

12. Přejděte na záložku **Google APIs** a v sekci **Google Maps APIs** povolte:

- Google Maps JavaScript API
- Google Maps Embed API
- Google Maps Geocoding API

Google APIs **Enabled APIs (3)**

Some APIs are enabled automatically. You can disable them if you're not using their services.

API ^	Quota	
Google Maps Embed API	<div style="width: 0%;"></div> 0%	Disable
Google Maps Geocoding API	<div style="width: 0%;"></div> 0%	Disable
Google Maps JavaScript API	<div style="width: 0%;"></div> 0%	Disable

13. Zkopírujte oba API key a nastavte je v sekci **Nastavení systému** úplně dole
